DETAILED ACTION

Allowable Subject Matter

1. Applicant is advised that the Notice of Allowance mailed 10/5/2005 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.
2. Claims 11, 13-17 are now in the case. Claims 1-10, 12 and 18-19 are cancelled. Upon further consideration of the previously allowed claims 11, 13-17, the 35 USC 102 rejection mailed on May 17, 2005 is now re-instated.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11, 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Krohn et al. (U. S. Pat. 4,036,624).

Patent to Krohn et al. teaches a dyeing device (Fig. 1) for dyeing a plastic lens 30 comprising a heating furnace (Fig. 1), a frame section 10 forming a space 14 within the heating

Art Unit: 3749

furnace (Fig. 1) and a cooling mechanism 20-23 within the heating furnace (Fig. 1) separate from the frame section 10 in a position corresponding to a portion of the lens 30 within the frame section 10 not requiring coloration; a heating section 16 provided within the frame section 10; an openable insertion port for allowing insertion of the lens provided on or near a bottom surface of the frame section 10, a lens-holding mechanism 31 for holding the lens 30; and a lens-moving mechanism 31 for moving the lens-holding mechanism 31 to insert all or a part of the lens 30 from the insertion port into an interior portion of the heating furnace. For claims 13-15, the lens moving mechanism and temperature are controlled (Fig. 2).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krohn et al. (U. S. Pat. 4,036,624) in view of Kamata et al. (U. S. Pat. 6,520,999).

The dyeing device of Krohn et al. as above includes all that is recited in claims 16-17 except for a vertical movable lens-moving mechanism. Kamata et al. teach a dyeing device with a lens-moving mechanism 11, 12 for moving lens in a vertical direction same as claimed. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the lens-moving mechanism 11, 12 of Kamata et al. for the lens-moving mechanism 31 of Krohn et al. in order to move lens in a vertical direction.
